

Control transportation spend, optimize performance.

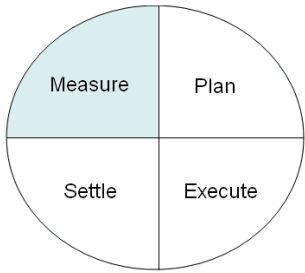

**On Demand. On Premise. On Budget.**

AgileElite streamlines all of your transportation processes into one seamless, cost-effective solution. Whether integrated within your IT environment or accessible from our hosted platform, AgileElite's suite of TMS solutions provide you with the visibility and control you need to manage costs and stay ahead of the competition

AgileElite helps you automate routing, rating, packing, labeling, manifesting, tracking, POD, audit, reconciliation and payment for all parcel and freight shipments across your enterprise and beyond. Use the wealth of information AgileElite stores to continuously analyze, model, and plan improvements to your supply chain.

## Features

You can only manage what you measure. Reducing costs and improving performance starts with collecting and analyzing data.

### **Control transportation costs.**

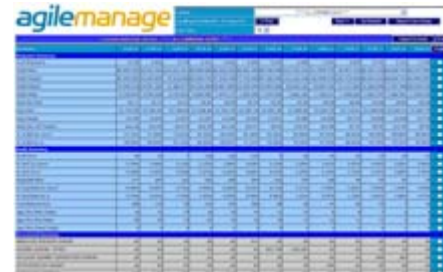

Transportation costs soared 15% last year and there is no end in sight. AgileManage helps you manage your transportation spend costs more effectively by giving you instance access to all inbound and outbound transportation costs, and insights that add directly to your bottom line.

*Dashboards provide a quick graphical view of key performance indicators*

### **Monitor performance.**

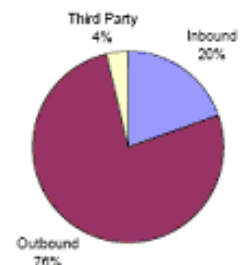

Carrier Report Cards allow you to view every aspect of carrier performance including service quality, billing accuracy, accessorial detail, shipping volumes, and claims. With just a few clicks, the system lets you select modes, carriers or groups of carriers and compare, graph, and reports on shipping trends. Finally, the insights you need to establish measurable and achievable best practice standards.

*Carrier report cards measure and report against carrier performance*

### **Cost accountability.**

With a single data repository for all transportation costs, AgileElite helps you manage expenses by updating your billing system with accurate shipping charges, allocating charges against cost centers, and preventing unauthorized use of account #s.

*Generate ad hoc reports and graphs based on user defined variables & rules*

**One Repository for All Transportation Data**

**Analyze Historical Performance Trends**

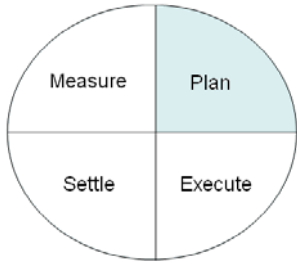

**Carrier Report Card & Benchmarking**

**Rate & Bid Negotiation Consulting Services**

**Best Practices and Ad Hoc Reporting**

**Key Performance Indicator Dashboards**

**Logistics & Financial Reporting Drill Down**

## Features

Leverage negotiated carrier rates with optimized carrier route and service selections.

### Intelligent decision support.

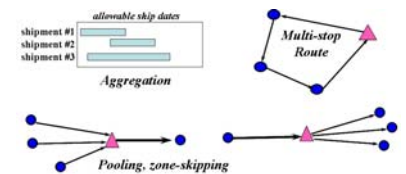

Carriers offer a myriad of rates and services. You need to ensure your employees and supply chain partners select the right service at the right price, every time. AgileRoute helps you model, plan, and implement complex routing rules for inbound and outbound shipments.

Authorized users access AgileRoute via Web browser or API

### Eliminate wasteful spending.

Industry experts estimate that shipping costs are bloated by more than 20% due to use of unnecessary premium services, failure to consolidate loads to less expensive modes, and inability to enforce corporate routing policies and eliminate "rogue" transportation spending. AgileSupplier helps your vendors to comply with your delivery requirements, cost-effectively.

Realize 10-20% savings by consolidating orders and loads, mode shifting from parcel to LTL to TL.

### Reduce unexpected accessorials.

AgileRoute verifies order data to ensure the accuracy of ship-to addresses, residential status, shipment dimensions, freight class and other variables that could result in unexpected and unrecoverable accessorials and surcharges.

Modeling tools enable you to determine cost impacts of proposed changes to routing rules.

Consolidate Parcel -> LTL -> TL Shipments

Customize Routing Rules Based on Multiple Variables

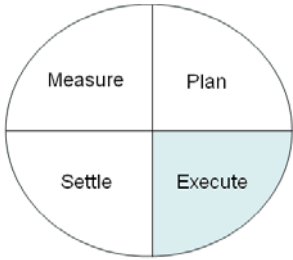

Model "What if" Routing Scenarios

Web-based Supplier Routing Guides for Inbound Shipments

Verify Addresses & Residential Status

Fuel Surcharge Management

Authorize Users and Expedited Service Requests

## Features

Process Parcel, LTL and TL from Domestic & Inter'l Origins

Certified By All Major Parcel Carriers

Automate Export & Hazmat Processing

Warehouse, Desktop, & Supplier Shipping

Pack Verification, ASN and Compliance Label Printing

Real-time Connectors to Oracle, SAP, and other ERP Systems

Tracking, POD, Event Management & Alerts

Streamline shipping and compliance control at point of execution. Use visibility tools to manage delivery status and exception alerts.

### Multiple carriers, one system.

Too many companies leave routing, rating and shipping execution to disparate carrier-provided systems and lose visibility and control over processes, information and costs. AgileShip routes, rates, ships, and tracks parcel, LTL and TL shipments across your enterprise, collecting valuable information to help you manage costs and performance.

Weigh, route, rate, label, document, and transmits parcel and freight shipments, all from a single, simple user interface

### Reduce compliance risks.

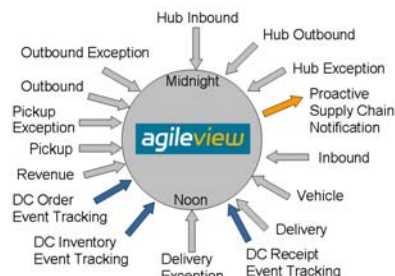

Every day customers and regulatory agencies are mandating new fulfillment and documentation requirements. Can you comply? AgileShip reduces the risk of penalties and disruptions by ensuring accurate, consistent processes and documentation for Sarbanes Oxley, DOT, Customs, and vendor compliance.

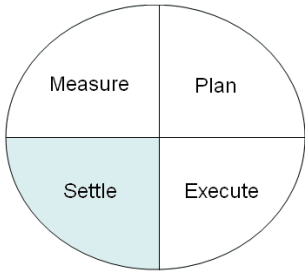

Generate export documents & automate electronic filings for international shipments.

### Enhanced Visibility & Control.

During the execution process, AgileShip collects shipment information down to line item detail. This enables AgileView to search for shipping transactions by any field and track in-transit status. AgileView

EDI connections with 800+ carriers feed in-transit tracking and proactive event management alerts.

Close the loop by reconciling audited carrier invoices vs. expected shipping costs.

## Features

Streamline parcel & freight audit, pay and claims processing

Check rating accuracy, discounts, weights, contract compliance

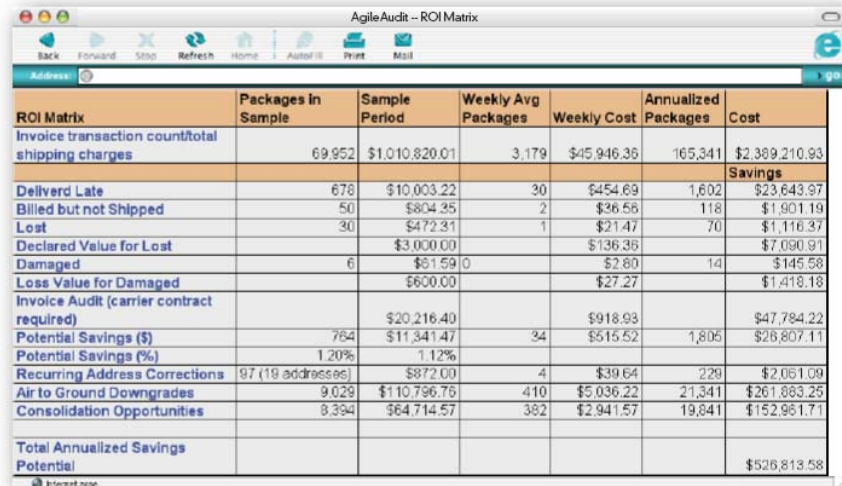

Monitor Exceptions: Manifested But Not Shipped, Lost, etc

Verify accessorials and surcharges

Monitor 3<sup>rd</sup> Party Account Usage

Exception Reports and KPIs

Cost Allocation and GL Coding

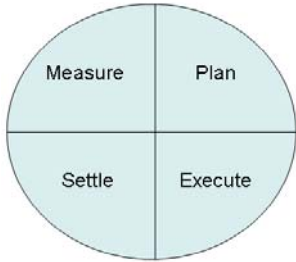

ROI Matrix	Packages In Sample	Sample Period	Weekly Avg Packages	Weekly Cost	Annualized Packages	Cost
Invoice transaction count/total shipping charges	69,952	\$1,010,820.01	3,179	\$45,946.36	165,341	\$2,389,210.93
						<b>Savings</b>
Delivered Late	678	\$10,003.22	30	\$454.69	1,602	\$23,643.97

<b>Total Annualized Savings Potential</b>						<b>\$526,813.58</b>

AgileAudit's powerful reporting tools allow you to monitor, measure and control all shipping activity, providing you actionable data to improve your bottom line.

## Financial and Operational Control.

Shippers work hard to negotiate good rates and manage the use of transportation services, only to find that anticipated costs varies significantly from parcel and freight carrier invoice charges due to errors and unexpected accessorials and surcharges. AgileAudit helps you identify gaps in your process and implement the financial controls you need to reduce costs and improve operational performance.

- Validate Invoice
- Multi-level Duplicate Check
- Confirm Shipment
- Confirm On-time Delivery
- Confirm Service, Class, Miles
- Weight and Dimension Check
- Validate Rates & Discount Tiers
- Fuel Surcharge Check
- Accessorial Fee Check
- Claims Analysis
- Inco-term Audit and Analysis
- Commodity Audit and Analysis
- Harmonize Audit and Analysis
- Tax, VAT Audit and Analysis
- Carrier Compliance
- Exception Analysis
- Cost Allocation & GL Coding
- Exception Reporting
- Payment Cycle Reporting
- Cash Management

## Services

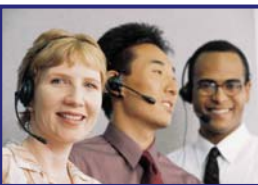

*Consulting, Rate Analysis,  
& Benchmarking*

*Requirements Specification,  
Systems Integration & Design*

*Project Implementation &  
Training*

*Customer Service &  
Support*

A knowledge network of industry experts committed to best practices, technology, and people, to make you more Agile.

### **Deep domain expertise, customer centric focus.**

With over 20 offices across North America and Europe, Agile Network services over 1,000 clients across all industries. We are an organization of experienced logistics, transportation, and systems integration experts with deep domain expertise that help business of all sizes reduce costs, streamline business processes and improve customer service.

### **Enterprise class technology adapted to the way you work.**

AgileElite is built on a Service Oriented Architecture (SOA) TMS platform developed to scale from on a single workstation to clustered servers capable of servicing thousands of users in multiple locations across the globe. As you grow, your solution can grow with you. Our systems integration and business process orchestration tools enable Agile consultants to wrap solutions around role-specific requirements. It's the one transportation management system you will ever need to stay Agile and ahead of the competition.
